

— FOR SEARCH FUNDS

You are buying a company to run it.
Analyse it as if you were keeping it forever.

Independent buy-side support for search funds in Spain: access to SMEs outside the open market, buyer's-eye analysis and valuation, and a clear recommendation before you put a number on the table.

Off-market deal flow

Direct relationships with the advisers, law firms and owners of Spanish SMEs that never reach a listing portal. Opportunities born of trust, not of an auction.

A buyer's eye

I analyse each business as if I were keeping it forever: its quality, its risks and a reasoned valuation range before you negotiate.

No success fees

I work alone, and only for you. Never for both sides of a deal, and no fees tied to closing: my recommendation does not depend on the deal getting signed.

SCOPE Established Spanish SMEs · typically €1-10M revenue · across Spain

FROM THESIS TO CLOSING · WHAT I CAN DO FOR YOUR SEARCH

Investment thesis

Define precisely the kind of company you are after: sector, size, profitability, location and investment criteria. A good acquisition starts with a clear thesis.

Analysis & valuation

The quality of the business, the factors that create value and a reasoned valuation range before setting a price.

Negotiation & structure

Price, structure and the main terms of the deal, protecting your interests from the first offer to signing.

Search & selection

Identify and filter the companies that genuinely fit your thesis, including opportunities outside the open market.

Due diligence & strategic fit

The main risks of the deal and whether the company fits your investment and value-creation goals.

Coordination & closing

With legal, tax and financial advisers, keeping the deal under control through to closing.

HOW WE WORK · FROM THESIS TO CLOSING

- 1 **First conversation**
What you are after, with which criteria, and what kind of company makes sense in your target sector.
- 2 **Scope & confidentiality**
Services, calendar and a non-disclosure agreement. Everything agreed before we start.
- 3 **Opportunity analysis**
Screening, valuation, due diligence and coordination of specialists, according to the scope defined.
- 4 **Conclusions & recommendation**
Not just a report. A clear answer: whether I would buy this company, on what terms, and which risks justify renegotiating.
- 5 **Support in the negotiation**
By your side through the negotiation and the closing, and available for the opportunities that follow.

THE SOUTH, SPECIFICALLY

- **Agrifood and greenhouse supply chain:** growing, packing, plastics, steel structures, irrigation and post-harvest. A fabric of profitable family firms that nobody calls.
- **Cold-chain logistics and transport,** with recurring contracts and real assets on the balance sheet.
- **Metalwork, processing and technical services** to industry and construction.
- **Why it is off-market:** these companies have never had a call from an investment bank, and their owners do not think in terms of a competitive process.
- **Why now:** a generation of founders from the 1980s and 1990s is reaching retirement without a clear successor at home.
- **How you reach them:** through the accountant who has kept their books for twenty years, not through a sale mandate.

FEES · INDEPENDENCE BY DESIGN

A simple structure, in writing before we start: a monthly fee during the active search and fixed fees per opportunity analysed, according to scope. **No percentages tied to closing.** My only incentive is that you buy well, including the recommendation not to buy when the numbers do not add up. Concrete scope and figures, in the first conversation and in writing.

ABOUT ME

Carlos Torres, founding partner. Master in Finance from IE Business School, CFA Level II passed, and experience in valuation and investments at Alantra and AFI. I work in Spanish, English and French, personally and with a small number of mandates at a time.

Start with the thesis, not with a list of names.
